DC48

Product Description

The DC48 is a professional 4in/8out Loudspeaker Management System with 24bit/96kHz Sampling Rate. All Inputs and Outputs are switchable between balanced Analog or Digital AES3 Signals. Additional to the Standard IIR filters are additionally FIR Filters with up to 768 taps per Channel available.
The DC48 can be controlled with Windows Software via TCP/IP, USB or RS232.

Technical Data

Description:	Loudspeaker Management System
Channels:	4in/8out with free routing
	Input/Output Analog and AES3
Features:	IIR Standard Filters + FIR Filters
	Delay up to 2000ms per Channel
Sampling:	24bit/96kHz
Connection:	Symmetrical XLR
Power Requirements:	AC 180~240V (90~120V) 50/60Hz
Remote Control:	Front Panel and Software
Dimensions (WxDxH):	483mm (19") x 350mm x 45mm (1U)
Weight:	4.5kg
